

Escea Crystalight Fuel Bed

Like precious stones, this fuel effect creates a high end, modern look, magically reflecting moving flames from the many facets of the crystalight. This is the most contemporary fuel effect for the Escea luxury indoor fireplaces and is hugely popular. The following options are available:

White Crystalight

The white colour in the firebox creates a light airy space for gas flame performance. The play of light and shadows is mesmerising.

This fuel bed is available for:
DX Series (DX1500, DX1000)
DL Series (DL1100, DL850)

Transparent Crystalight

A neutral, modern design element for those who want something different from traditional wood or pebbles.

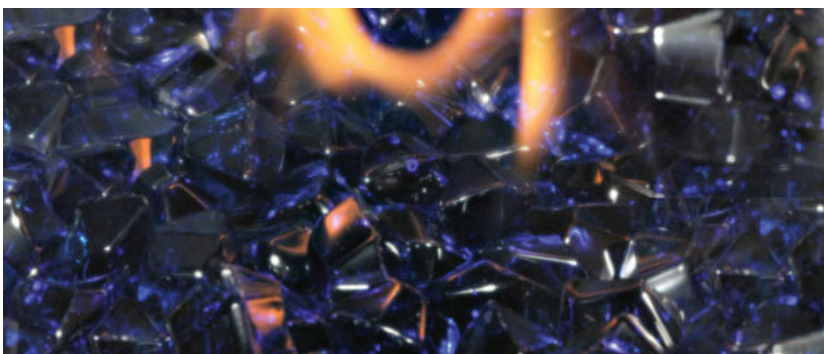

This fuel bed is available for:
DX Series (DX1500, DX1000)
DL Series (DL1100, DL850)

Black Crystalight

The black crystalight fuel bed contrasts well with the yellow flames of the fire. It works particularly well with the metallic silver Escea fascia

This fuel bed is available for:
DX Series (DX1500, DX1000)
DL Series (DL1100, DL850)

Royal Blue Crystalight

This stand-out fuel bed has a bluish glow, giving colour continuity to those wishing to match a darker blue in their decor. This option contrasts well with the lighter finishes and silver Escea fronts.

This fuel bed is available for:
DX Series (DX1500, DX1000)
DL Series (DL1100, DL850)
