

Velo

Escea Picture Frame Fascias

The Velo fascia is a frame within a frame, creating a minimalist look for an Escea indoor fireplace thanks to its clean straight lines. The Velo bevelled look creates a picture frame, drawing one's eyes to the flames whilst at the same time maintaining a minimalist look of the fireplace. The fascia subtly protrudes from the wall and can be installed floating on the wall or optionally sitting on a hearth.

Satin Black

Metallic Silver

FRAMES

A popular Velo fascia option is a 4 Sided variation which can be installed on any height on the wall. For design purposes you can choose to place a fireplace above a hearth of your choice and in such case a 3 Sided option will be ideal. The wide aspect DX1500 and DX1000 fireplaces can be optionally finished with a Single Framed Velo front.
