

Frameless

Escea Absolute Minimalist Design

When the wall surrounding a fireplace is itself a work of art, no additional adornment is needed, making the frameless option a perfect choice. Eliminating the frame leads the eye straight towards the flames, turning the entire wall surrounding the fireplace into an attention grabbing feature in the room.

The frameless option gives you the freedom to choose a look for the fireplace that is truly unique. With Escea you have this choice for both wide aspect indoor gas fireplaces and the outdoor cooking fire running on wood.
